1. Swiss Hiking Summit

MEGA TREND HIKING

Hiking is the most popular leisure activity among the Swiss. In late summer 2022, Gstaad will become the new industry meeting place for all things about hiking. Together with the Association of Swiss Hiking Trails as a competence partner, we will be holding the 1st Swiss Hiking Summit from 22 to 23 August 2022 - a specialist event on trends, offers and developments on the subject of hiking. The aim is to create a competence platform that allows people to experience, understand and help shape hiking in an interdisciplinary way and to accompany concrete projects.

1. Swiss Hiking Summit

FOR WHOM?

The aspiration of the Swiss Hiking Summit is to develop into a competence platform (B2B). The aim is to support DMOs, tourism service providers, municipalities, regions and other stakeholders to become capable of strategy and investment, to learn from and inspire each other, and to launch and implement projects together.

WHAT IS THE FORM?

The Swiss Hiking Summit is not a classic congress. The mixture of instructive specialist event, networking, innovation generator and excursion into the beautiful Gstaad mountains makes this event unique. In addition to presentations and panel discussions, some programme items are also held in a relaxed outdoor atmosphere exactly where the national sport of hiking takes place.
